EXPERIENCE

Dr.Mehta's Hospitals — *Network Security Analyst*

SEP 2024 - PRESENT

Roles and Responsibilities:

- **Endpoint Security Management**
  Managed ESET endpoint security with policy enforcement, daily scans,Device Control and threat resolution.
- **Endpoint Monitoring & Support**
  Managed endpoints via Tactical RMM with automated health checks, updates, scripting, and remote support.
- **Network Monitoring & Alerting**
  Administered Zabbix NMS with custom dashboards, alerts, and proactive monitoring of servers and network devices.
- **Tool Integration & Implementation**
  Implemented tools like Zabbix, Tactical RMM, and Wazuh to enhance IT management, monitoring, and security.
- **Firewall & Network Security**
  Managed Fortigate firewall, handling policy enforcement, rule audits, performance tuning, and incident response.
- **Wireless Network Administration**
  Managed UniFi AP Controller with health monitoring, troubleshooting, and configuration backups.
- **LAN & Switch Management**
  Provided network support through VLAN setup, port management, and troubleshooting, managed L2 and L3 (Core) switches to ensure stable and efficient network performance.
- **Server & Storage Administration**
  Administered Windows servers (DHCP, DNS, AD) and managed QNAP file server for storage, permissions, and user access.
- **Virtualization Management**
  Managed VMware ESXi servers, including provisioning and configuring virtual machines to support business operations.
- **Ticketing & Issue Management**
  Utilized SHIVAM ticketing tool to efficiently track and resolve network issues, ensuring timely incident management and service continuity.

SKILLS

Routing & Switching

IP Addressing & Subnetting

Wireless Networking

DHCP, DNS, AD Servers

Endpoint Security

Network Monitoring System

Web Pentesting & Bug Hunting

Server Virtualization

Network Troubleshooting

Web Application Development

Linux Administration

CERTIFICATION

CCNA – Suren Networks

EHE Ethical Hacking Essentials – EC Council

FCA Fortinet Certified Associate – Fortinet

SQL Injection Attacks – EC Council

Python – GUVI

CyberSecurity Essentials – CISCO

Intro to Splunk – SPLUNK

INTERNSHIP

Code Alpha — *Cyber Security Analyst*

AUG 2024 - SEP 2024

Worked on security tool implementation projects, including developing a basic network sniffer to analyze and capture traffic data. Gained hands-on experience in security tool development, network traffic inspection, and basic packet analysis.

EDUCATION

Apollo Arts and Science College, Chennai — *BCA*

MAR 2021 - APR 2024

Little Jacky Matriculation School, Chengalpattu — *HSC*

MAR 2021 - MAR 2021

Little Jacky Matriculation School, Chengalpattu — *SSLC*

MAR 2019 - MAR 2019

PROJECTS

Zabbix Monitoring System with WhatsApp Alerts
Implemented Zabbix with custom dashboards and WhatsApp alerts via API for real-time notifications, boosting incident response and proactive infrastructure monitoring.

Tactical RMM Implementation
Deployed and configured Tactical RMM for remote monitoring and automated maintenance, improving endpoint management and overall IT operations visibility.

Network Monitoring System (NMS) Tool
Developed a full-stack Network Monitoring System with Python, Flask, and MySQL, featuring automated uptime checks, downtime logging, and a real-time web dashboard for efficient device management and monitoring.

Automatic Backup Script for Network Devices
Developed a Python script with Paramiko to automate network device backups via SSH, organizing files by date for easy management and improved reliability.
